

ALCON,

This email is intended to notify our customers of recent changes made by NGA regarding National Oceanic and Atmospheric Administration (NOAA) charts. We realize that many of customers do not use NOAA charts, but the Remote Replication Service locations and contact numbers may be useful to you.

NOAA Print-on-Demand charts are now available on NGA's NIPRNet at <https://www.geointel.nga.mil/products/dnc/epods/noaa.php> for download and printing. NOAA Print-on-Demand charts are updated on a weekly basis and include all of the latest critical chart corrections. Each chart is official and should be updated from the corrected through dates shown in the lower left corner of the chart. The charts are .pdf files and can be printed at either one of the following global Remote Replication Service centers:
