

DSCR's Chemicals and Petroleum Products (Class IIIIP) Support Program

(This program does NOT include Class 1 Ozone Depleting Substances (ODS)!!! – Continue to use established ODS Program procedures and Points of Contact)

Defense Supply Center Richmond (DSCR) awarded a chemical and petroleum products support contract to Science Applications International Corporation (SAIC) to manage the supply, storage, and distribution of chemicals and petroleum products to Military and Federal activities in the Continental United States (CONUS) and to replenish DoD wholesale stock levels at DLA's OCONUS depots. The Chemicals and Petroleum Products (Class IIIIP) Support Program includes:

- Continue to use your Service/Government agency automated ordering systems using MILSTRIP/FEDSTRIP (Standard Form 344) or shop online through DoD E-Mall.
- Once DLA-owned assets in CONUS depots have been depleted, SAIC will provide vendor-owned material that meets the same requirements that DLA-owned material met (NOTE: once DLA-owned assets are depleted, customers will no longer have visibility of available assets since they are vendor-owned until the vendor ships against a customer order and submits an invoice to DFAS.
- MSDSs and the value added information associated with them will continue to be available to registered customers of the DoD HMIRS on-line at <http://www.dlis.dla.mil/hmirs>.
- DSCR will continue to operate the QSL. SAIC will provide test reports to DSCR and in turn, DSCR will populate the QSL.

There are no customer returns of excess inventory authorized under this program (FTEs will not be accepted). Customers should dispose of, reutilize or redistribute excess inventory locally.

POC: POC: For additional information go on-line at:

<http://www.dscr.dla.mil/customerassistance.asp> or call Chemicals Administrative Contracting Officer, at (804) 279-2327 (DSN: 695) or Petroleum Administrative Contracting Officer, at (804) 279-4410 (DSN: 695).
